

## **Food Confluence 2026 Strengthens Collaborative Trade Ecosystem for Global Suppliers 1–3 July 2026 | CODISSIA Trade Fair Complex | Coimbatore, Tamil Nadu, India**

As India consolidates its position among the world's fastest-growing food and beverage markets, Food Confluence 2026 emerges as a decisive trade and investment platform for CXOs, investors and global suppliers. India's food processing sector is valued at over USD 500 billion, contributing nearly 14% to manufacturing GDP, while organised food retail and e-grocery are expanding at double-digit annual growth rates. The HoReCa market alone is projected to cross USD 125 billion within the decade, driven by urbanisation, premiumisation and private label expansion.

Hosted from 1–3 July 2026 at the CODISSIA Trade Fair Complex by Synergy Exposures, strategically located within South India's industrial and export corridor, the expo will convene over 30,000 qualified decision-makers. These include importers, distributors, supermarket chains, HoReCa procurement heads, institutional buyers, government bodies and private equity participants actively evaluating scale and partnerships.

With participation expected from more than 35 countries, Food Confluence provides structured access to SAARC, Middle East and South Asian trade networks—regions collectively representing over two billion consumers. The platform enables real-time negotiations, on-site deal closures and competitive intelligence across food processing, ingredients, packaging technologies, cold chain solutions and retail innovation.

Food Confluence 2026 is institutionally reinforced by the endorsement of leading trade and industry bodies, reflecting broad-based sectoral alignment. Such support is economically significant as it signals policy coherence, strengthens market confidence and enhances transactional efficiency within the trade ecosystem. When representative associations and export councils converge around a platform, they reduce information asymmetry, facilitate structured buyer participation and improve capital allocation outcomes. This collective backing elevates the expo beyond a commercial gathering, positioning it as a coordinated industry instrument designed to accelerate supply chain integration, cross-border trade flows and long-term sectoral competitiveness within India's expanding food economy.

More than an exhibition, Food Confluence 2026 serves as a strategic convergence point for capital deployment, cross-border collaboration and long-term market expansion in India's high-growth food economy.

Industry professionals are strongly advised to plan their calendars, mark the dates well in advance and register through the official website [www.foodconfluence.com](http://www.foodconfluence.com) to secure participation.
